TECHNICAL SKILLS

Languages: Typescript, Javascript, Java, C/C++, SQL (MySQL), NoSQL, HTML/CSS
Frameworks: NodeJS, ExpressJS, ReactJS, Spring Boot, JPA, Hibernate, MERN Stack
Technologies: MongoDB, Docker, AWS (EC2, API Gateway, Lambda, SQS, S3, RDS), RESTful Services
Others: Data Structures, Algorithms, Git, Problem Solving, Mongoose

EXPERIENCE

- Licious** Aug 2025 – Dec 2025
SDE II — NodeJS, Java, Redis, SpringBoot, Docker, sql, nosql, kafka, kubernetes Bangalore, India
- Implemented end-to-end **Retail Super Hub inward logging** and aggregation, replacing paper/Excel flows and improving ops effort by ~**30–50%** while making all SKU-level inwards fully auditable for dispatch planning.
 - Implemented a **scan-based inward reset** workflow that clears previously scanned item packets, allowing operators to safely rescan and correct inward entries without data inconsistencies.
 - Worked on **microservices architecture** using **Retrofit** for service communication and leveraged **Kafka** for building event-driven backend workflows..
- Siemens** July 2023 – May 2025
SMTS — Javascript, NodeJS, Springboot, kafka, Data Structures, Problem Solving, C/C++ Bangalorbe, India
- Optimized the printController module**, achieving a **200x performance improvement** in execution speed.
 - Engineered **robust and maintainable C++ code** using the Standard Template Library (STL) to enhance code efficiency and readability.
 - Designed and implemented a new flow for processing files in the simulator's parser, resulting in **55%** reduction in the input design file's parsing time.
 - Implemented cron jobs to run the performance test suite, leading to a notable **70%** decrease in performance-related issues reported by customers.
- HashedIn Technologies by Deloitte** March 2021 – July 2023
SDE I — JavaScript, Nodejs ,MySQL, DynamoDB, Springboot, HTML, CSS Bangalore, India
- Led full-stack development** and API implementation using **ReactJS** and **NodeJS** in a scalable microservices architecture.
 - Optimized GraphQL subscription flow by reducing AWS Lambda execution time from **50s to under 3s (94% improvement)**, enabling near real-time updates to end users.
 - Pulled data from the **data lake** and automated **Excel report** generation for business stakeholders, improving the reliability of recurring analytics.

PROJECTS

- CrediLink - P2P Lending Platform | Next.js, Java, Spring Boot, PostgreSQL**
- Developed the backend** for a peer-to-peer lending platform with **user role segregation for lenders and borrowers**, loan requests with/without guarantors, and **EMI management**.
 - Designed and implemented REST APIs** using **Spring Boot** with **PostgreSQL** for data persistence, and integrated custom logic for dynamic credit score calculation.
 - Deployed the backend on Render** for production access: credilink.onrender.com

EDUCATION

- MCA - Punjab University Chandigarh** Aug 2018 - Jun 2021
Master of Computer Applications — Percentage: 84.16% Chandigarh, India
- BCA - Punjab University Chandigarh** Aug 2015 - Jun 2018
Bachelor of Computer Applications — Percentage: 75.40% Chandigarh, India

ACHIEVEMENTS

- Cleared UGC-NET 2020 on first attempt.
- Google Cloud Certified - Associate Cloud Engineer.
